Utility Information Systems  
Project Feasibility Studies  
Planning & Investment Environment Mitigation

EMG brings together some of the brightest and most unique minds working in all areas of energy development today – regulation, restructuring, management, economics, and finance. Our partners are seasoned practitioners who have state-of-the-art knowledge and experience in energy market development, operation, and management. Our diverse experience, creativity, and integrated approach ensure that we fully understand the specific idiosyncrasies of each energy development challenge, and appreciate the varied political and economic environments in which the world's energy sectors function. In this way, we work hand-in-hand with our clients to craft the most practical and cost-effective long-term solutions.

In each technical specialty that EMG practices, we develop and implement customized training and capacity building programs that can multiply the impact of technical interventions and enable change and improvement on all levels of the organization/sector. Training and capacity building services can be customized to meet the needs of our clients. EMG believes in an integrated, teambuilding approach of experiential learning that combines traditional classroom instruction with hands-on skill training. In EMG training, participant and instructor interact on a level playing field, ensuring that the participant has a stake in the learning process. This holistic approach to capacity building offers the client immediate skills and knowledge, as well as long-term performance improvements.
